

CEILING TILES

Hy-C Co.

Chimney Cover - Black steel. 24-gauge single-piece galvanized steel hood. 18-gauge 3/4" expanded galvanized steel mesh. 14-gauge galvanized steel base for extra strength. Slotted hex-head mounting screws. Attractive black powder-coated paint finish. Outside mounting provides greater free air space for better draft. Optional leg kit (model No. SCLK) can be used to convert a SC series cap into a slip-in model. This heavy-duty stainless steel leg kit is used when the flu tile does not extend above the chimney crown.

Product No.	Mfg. No.	Description	Order Mult.	Weight	Unit Cost

GARAGE DOOR PARTS

NOTE 2: How to weigh your door **Caution:** Depending on size and weight of door, it is recommended to have at least two people to perform this procedure. 1. Disconnect garage door operator. 2. Springs must be in relaxed position, to do this procedure, secure door in the open position by using locking pliers and applying under bottom bracket roller. Prop door open with ladder. Disconnect springs from S-Hook on back hanger. **Caution:** Removing locking pliers will release total weight of door. 3. Doors vary in weight, up to several hundred pounds. When lowering door, care must be taken to avoid personal injury or damage. 4. Set bathroom scale at zero and place under door. 5. If door weight exceeds the limit of your scale, place center of 2 x 4 on edge approximately 4' in length under door. Place one end of 2 x 4 in center and on top of scale, and place the other end of 2 x 4 in the center and on top of something solid and same height of scale. 6. Take reading and double to determine weight of door. Example: If scale reads 135 lb. x 2, door weights 270 lb. springs needed are one 130 lb., one 140 lb. for each side of door.

Covalence Plastics

Black Polyethylene Sheeting - Lowest cost all-purpose protection against water vapor and foreign matter. Tough, strong body, yet soft, pliable. Lightweight with excellent durability, no cracking, peeling, rotting, or mildew. Has high-resistance to tearing. Permanent flexibility even at sub-zero temperature. Resistant to acids, alkalies, and most chemicals. Used for construction, agriculture, and industry. Full compliance with both VA and FHA specifications.

BUILDING MATERIALS

Intertape Polymer Group

Sheathing Tape - Aggressive solvent based acrylic based pressure sensitive adhesive, combined with the conformability and flexibility of polypropylene film, provides superior sealing, protective benefits, and ease of handling. Use for permanent seaming and sealing of joints in foam insulation and other sheathing materials, to secure lap edges in house wraps and other vapor barriers, repair rips and tears in roll and batt insulation, construction films, and membranes. Eliminates drafts around window and door openings. Superior bonding at sub-zero (as low as -40°) or at elevated temperatures. Resistant to mold growth and high humidity. Do not apply to wet surfaces (facing or wood).

Gardner Gibson

Superflash Neoprene Flashing Cement - Remains flexible and watertight for up to 20 years. Up to 50 times stronger than plastic roof cement. Elongation 250%. Elastomeric. For the construction and repair of all flashings, parapet walls, copings, and chimneys. Suited for sealing cracks, holes, tears in built-up roofs (asphalt and tar), and modified bitumen single plys. 10 oz. tube will average approximately 30 lineal feet. Coverage will vary with thickness of application. Let dry 24 hours before coating with an elastomeric coating.

Henry/Monsey

Snow White Reflective Roof Coating - Heavy bodied white coating is ideal as a protective and beautifying coating for the roofs of mobile homes and trailers. Recommended for use on the entire roof surface, and to seal around vent pipes and other openings on the roof. Spread evenly over the entire surface. Provides a weatherproof coating that adds to the appearance of the roof while reflecting sun's rays, keeping interior temperatures cooler. Economical, latex base, high solids. Roof may be coated when damp, but not when dripping wet, or when puddles are on roof. All seams, joints, and cracks should be patched with white acrylic latex sealant before application of coating. Do not apply when rain is imminent or when coating may be subject to heavy dew within a minimum of 5 hours. Do not apply to surfaces subject to ponding water. Spread with roller or large nylon brush. Do not apply if temperatures are below 50° F. This coating will dry in 2 to 6 hours under normal weather conditions. Do not use when rain is forecast for at least 24 hours. 1 gallon covers approximately 65 to 100 sq. ft. If surface is porous, spread rate may be slightly less.

Product No.	Mfg. No.	Description	Order Mult.	Weight	Unit Cost
103209-C	RC030046	Gallon	0/0/4	11.200	15.79 GAL

Henry/Monsey

SolarFlex White Elastomeric Roof Coating - Elastomeric, water-based, acrylic latex coating. Highly resistant to disbonding, chalking, mildew, and discoloration. Bright white with excellent *hide*. Lowers roof and interior temperatures. Prolongs roof life. Reduces air conditioning costs. Recommended for: Well drained surfaces which do not pond water, well adhered weathered previously coated white or aluminum roof surfaces, mineral surface cap sheet (conventional, SBS, or APP), smooth surface, stucco, parapet walls. Can be applied to a dry or slightly damp (not wet) surface. Coverage: Apply 2 coats of 1 gallon per 100 sq. ft. for each coat, for a total of 2 gallon per 100 sq. ft. Allow to dry between coats.

BUILDING MATERIALS

Henry/Monsey

Monsey Crack Patch - Ready-to-use, quick setting patch. Provides long-lasting surface protection. Fills cracks and crevices wider than 1/4" in asphalt driveway surfaces. Area to be filled should be washed or brushed thoroughly to remove loose dirt, debris, and gravel. If area to be repaired has been softened or damaged by gasoline or oil, the softened or damaged asphalt should be removed. If crack is more than 1" deep, apply Monsey Crack Patch in 2 stages. Allow first application to set up for about 4 hours before final material is applied. Do not apply when temperature is below 50° F. or when rain or frost is forecast within 24 hours. Allow patch to cure overnight before sealing or driving on the repaired areas. Clean tools and hands with clean water before material has dried.

MFM Building Products

Peel & Seal™ - Self-adhering waterproofing material featuring a reflective aluminum surface. Multiple laminations of special aluminum foil, high-density polymer films and a thick layer of rubberized asphalt waterproofing compound. Easily installed by removing the release paper and pressing the aluminum membrane into place. Cut to fit using scissors or razor knife. Lightweight, stretches to allow for building movement, won't crack or dry out, impervious to fungus, algae or bacteria. Uses: Dormer and porch roofs, small commercial, farm buildings, mobile homes, patch asphalt roofs, repair metal surfaces. 36" W. x 33-1/2' L. 100 sq. ft. per roll. Available in aluminum, white, and grey finishes.

Dolphin Sealants

Flexible Leak Sealer - 1 step permanent *water leak* sealant that comes in a tape form. Alternative to caulking, tar, and all other materials that don't stand up to time, temperature, and movement. Will never dry out, get hard, crack, separate, and leak again. Works outdoors or indoors, above or below grade. Nontoxic, mold and mildew-resistant, and it stops rust and corrosion, Cut it to shape with scissors and press into place by hand. Permanent repair on any surface: Metal, tar, concrete, wood, PVC, plastic, glass, etc. Use on roofs, gutters, drainpipes, trailers, RV's, boats, and boots. Limited lifetime warranty.

KST Coatings/Snow Roof

Storm Patch All-Weather Patching Cement - Ideal for sealing roof leaks on wet surfaces, displaces water from the wet surface and effects a tight seal. It is effective in wet or dry, hot or cold weather conditions. Repairs holes and cracks in composition, asphalt coated built-up roofing, clay and cement tile, metal and concrete roofs. Seals leaks and openings around flashings, chimneys, vents, skylights, joints, gutters, pipes, and similar objects. The elastomeric patch dries to form a highly elastic membrane which expands and contracts with the changing temperatures. Nonasbestos.

KST Coatings/Snow Roof

Roofers Best Professional Reflective Roof Coating - A white, professional-grade elastomeric coating for sealing and saving roofs, reflecting sunlight, lowering interior temperatures to reduce cooling bills. This liquid rubberized coating flows into cracks and crevices and dries to seal leaks. It will dry to form 400% elastic roofing membrane that remains flexible at -25°. Resists cracking and peeling, reducing expansion and contraction. It will bond to virtually any surface.

CORRUGATED PANELS

PLASKOLITE, INC.

XL10 Polycarbonate Lexan Sheet - Lexan is a polycarbonate sheet that is 250 times stronger than glass with excellent weatherability and insulating properties. Commonly used in many glass replacement applications. Used to protect stained glass windows, vending machines, and display cases. Also used in high-security areas due to strength and impact resistance. 10 year warranty against yellowing and breakage. Lexan can be easily cut with a scoring knife. .093" thickness.

JOIST HANGERS

BUILDING MATERIALS

United Steel Products

Slant Nail Joist Hanger - Offers double shear nailing. Patented dimple allows for 30° to 45° nailing through the joist into the header, resulting in higher loads and less nailing. Slant nailing also eliminates the need for shorter joist nails in 2X applications. 18-gauge. Finish: 90 galvanizing. TZ indicates triple zinc.

Face Mount Single I-Joist Hanger - Provides full lateral support of the I-joist top chord. Web stiffeners are normally not required when the hangers side flanges support the top flange of the I-joist. Raised dimple ensures proper 45° nailing. Seat cleat automatically holds the I-joist bottom flange tight to the hanger seat.

United Steel Products

Elevated Post Base - Allow installers to pre-align posts and preset post heights above concrete floors or footings. Eliminates post-to-concrete contact; moisture damage is reduced. Model No. EPB series is welded and primed, model No. EBG44 series is G90 galvanized for added corrosion resistance. Embed steel tube into wet concrete after screeding. A 3" minimum edge distance is required to achieve allowable loads. The tube shall extend above the concrete surface a maximum of 1". Not recommended for fence posts or unrestrained applications. Not designed to resist overturning (moment) loads. TZ indicates triple zinc.

Post Support - Accepts 4" x 4" posts. Tapered steel shaft. Removable forcefit clamps keep post secure. Built for strength with screws to secure post. Use for building fences, decks (unattached to houses), signs, mailboxes, and bird feeders. Metposts are stronger by design with their X configuration that requires more earth be displaced in order for the post to move in any direction. Welded steel construction that's guaranteed against clamp and weld failure for lifetime. Finished in dark green.

Tell Manufacturing

Metal Door Frame - CECO commercial metal door frames for drywall installation. Includes header, hinge jamb, and strike jamb. 16-gauge galvanized, prime painted steel. Plumb anchors standard. 7-gauge hinge reinforcement. 5-3/4" depth with 4-7/8" throat (for standard 2x4 stud wall, up to 5/8" exterior material and 1/2" interior drywall). Tab in slot design. Standard CECO hinge and strike locations. Order door frame by door size and left or right hand. Door frames are for in-swing or out-swing door applications. Frame may be modified on the job for concrete wall applications. Order door frame anchors separately.

STEEL DOORS

NOTE: Determine handing by viewing the door from the outside of the room, or the key side. If the key-handset is on the right and the door swings into the room, away from you, this is a left hand (in-swing) frame. If the key-handset is on the right and the door swings out of room, toward you, this is a left hand reversed. Left hand reversed = Right hand frame.

Tell Manufacturing

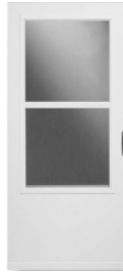

Commercial Flush Metal Door - The Versador is a flush 20-gauge galvanized metal door. It is prime painted and polyurethane insulated with 7-gauge hinge reinforcement, and closer reinforcement. 161 Prep (standard commercial prep specs). CECO standard hinge and lock locations. Nonhanded door, reversible on the job site. In stock size 3068 and 3070. Square lock edge. Hardware and hinges not included. 4-1/2" full mortise hinge required.

Masonite

6-Panel Textured 1-3/8" Door Only - The 6-panel textured door is an exact replica of a raised 6-panel wood door, at about half the cost. It is die-formed in a single sheet of durable Masonite brand hardboard, with precise detailing of covs, beads and joints. Adding to the door's classic appearance is the skillfully embossed wood graining that goes into every one of these handsome textured facings. Another important benefit is the consistent quality that is achieved through the care that goes into the manufacturing process. 6-panel textured doors come primed and ready for painting in a wide range of dimensions. **Construction:** All framing members are a fiber construction. 2 lockblocks, beveled both sides and primed. Masonite/Premdor standard warranty will apply.

Larson Mfg.

Retractable Aluminum Screen - The Ultra Breeze retractable screen functions like a traditional screen door without diminishing the view. The retractable screen system attaches to the exterior frame of in-swing, entry doors, sliding patio doors, or french residential entry doors. Aluminum frame with reinforced magnetic seal keeps door closed. Top and bottom rails ensure a smooth glide. The durable mesh screen rolls into a cassette and out of sight when not in use. Installs in less than 1 hour. Tools required: Screwdriver, hacksaw, or circular saw (if trimming is required). White.

Custom Building Prod.

Wonderboard Backerboard - Glass-mesh, cementitious tile backerboard, developed to provide a permanent base for ceramic, marble, and slate tile installations. Approved for wet area use in tub enclosures, tub-showers, and showers, over dry well braced wood studs, furring, or steel studs. Also recommended on floors, countertops, lavatory tops, ceilings, and as a UL listed floor protector and heat shield for solid fuel stoves. Unaffected by water, moisture, and steam. Will not decay, warp, or soften. Tapeless installation on open mesh edges that provides superior edge bond strength. Patented soft wrap, rounded edge panels are easy-to-handle, score, snap, and cut out. Fasten with nails or screws. Withstands 30 P.S.F. wind loads. Exceeds ANSI A118.9. 36" W. x 60" L. For interior/exterior use.

Macco Adhesives

Ultra Duty Poly Construction Adhesive - VOC compliant. A polyurethane adhesive with excellent weather resistance and low-temperature flexibility for a strong bond indoors and outdoors. Recommended for bonding subfloors, foamboard, granite, marble, ceramics, mirrors, 1/8" MDF paneling, plywood, waferboard, tileboard, cabinets, countertops, drywall, plastic, and vinyl and brick veneers to most common building materials. Not recommended for ceiling tile. 4 times more durable than conventional adhesive. Exterior and interior uses. 8 to 12 hours cure time. Exceeds APA-AFG-01, ASTM C-557, and ASTM D 3498 specs. Coverage: 30 linear ft. using a 1/4" bead. 10 fl. oz. cartridge.

Product No.	Mfg. No.	Description	Order Mult.	Weight	Unit Cost
265929-C	LN950	10oz Ultra Poly Adhesive	1/0/12	1.333	4.29 EA

Macco Adhesives

Ultra Quik Grip Construction Adhesive - VOC compliant. A premium high-strength adhesive with quick initial grab. No bracing required. Recommended for bonding paneling, foamboard, concrete, ceramic tile repair, plywood, waferboard, plaster, drywall, cork, furring strips, brick, lumber, and glass to most common building materials. Not recommended for mirrors, plastic, vinyl, and metal. Use on vertical and horizontal surfaces. Minimizes the need for using fasteners. Exterior and interior use. Low odor. Water clean up on fresh adhesive. Coverage: 30 linear ft. using a 1/4" bead. 10 fl. oz. cartridge.

Pro-Series® formula 38 Drywall Construction Adhesive

- A synthetic rubber and resin based, nonstaining waterproof adhesive specially developed for adhering drywall to structurally sound surfaces. Bonds gypsum board to wood or metal studs, laminating gypsum board to gypsum board, and gypsum board to concrete or block walls. *Do not* use on unlined expanded or extruded polystyrene foam. Not recommended for use on prefinished vinyl covered gypsum panels, polystyrene or ABS plastic panels. Prevents nail pops, bridges minor framing irregularities, and reduces fastener use up to 50 to 60%. Meets or exceeds ASTM-C557-73 specifications. Extremely flammable. 1 year shelf life. Color: Tan. Coverage: 40 linear ft. using 3/8" bead. 29 oz. cartridge.

Henkel Corp/ OSI

Pro-Series® SF-450™ Heavy-Duty Subfloor And Construction Adhesive

- A synthetic rubber and resin based, premium grade construction adhesive developed for glued floor systems. Pro-Series® offers improved cold weather formula to provide excellent adhesion and extrusion under all-weather conditions. It offers fast set, superior strength development and is compatible with most building materials. Bonds to wood, drywall, plaster, metal, masonry, concrete, brick, ceramic tile, slate, and treated lumber. *Do not* use on unlined expanded or extruded polystyrene plastic foam, mirrors, or where temperatures exceed 160° F. Quick initial grab, up to 15 minutes working time. Approved for HUD-FHA application per UMB No. 60, exceeds APA specifications AFG-01, ASTM-D-3498, ASTM-C-557-73 and conforms to CGSB-71-GP-26M specification. Extremely flammable. 29 oz. cartridge yields approximately 89 linear ft. at 1/4" bead, 3/8" bead yields 40 linear ft. 1 year shelf life. Color: Tan.

G. E. Silicone Prod.

GE-400 Subfloor & Deck Adhesive - A synthetic rubber and resin based, high-quality adhesive for the installation of subfloors, general construction, paneling, decks, and more. Bonds to most common building materials including wood, metal, glass, wallboard, concrete, stone, polyurethane, and drywall. Not recommended for use on tub enclosures, foam board, plastic, ABS plastic, polystyrene, or where temperatures exceed 120° F. Formulated for professional use. Meets APA AFG-01, HUD/FHA bulletin UM-60, ASTM D-3498, ASTM C-557. Ideal for wet, frozen, and treated lumber. Extremely flammable. 1 year shelf life. Color: Light tan.

Panel and Foam Adhesive - Specially formulated, dual-purpose construction adhesive designed to bond all types of paneling and polystyrene foam. Bonds to wood, metal, plaster, masonry, and other common building materials. Quick-grab formula reduces nailing requirements. Will not etch, burn, or eat foam board insulation or other styrene products. Meets ASTM Specification C 557. For interior and exterior use. 10.3 oz. cartridge.

Henkel Corp/ OSI

Construction Adhesive - Plastikon 200 Construction adhesive.

Securely bonds most building materials. Automatically shims surface irregularities up to 3/8". Assures nonwavy, professional looking finished walls. Remains resilient and provides superior moisture resistance. Provides up to 20 minutes open time. Use for a variety of interior applications such as panels, floors, stairs, mouldings, etc.

Henkel Corp/ OSI

Heavy-Duty PL400 Construction Adhesive -

High-performing, all-weather adhesive specially formulated for heavy-duty construction projects and for use on treated lumber. Bonds securely to most building materials with the exception of polystyrene foam. Will bond directly to metal, concrete, and masonry. Stiffens floors up to 98% with less deflection. Bridges framing irregularities as much as 3/8". Water-resistant. Eliminates freezing problems. Remains resilient over long-term aging. Absorbs noise and prevents squeaks. Compounded for interior and exterior usage such as subflooring, sheathing, battens, etc.

Henkel Corp/ OSI

Foam Board Adhesive - Premium-grade formulation for foam

insulation. Will not burn, etch, or eat foam. Bonds 2 surfaces together without destroying the insulating efficiency of the foam. All temperature use from -10° to 120° F. Use on all brands of foam board, wood, concrete, brick, metal, tub surrounds, and drywall. Waterproof, light blue color. Coverage: One 10.2 oz. cartridge will bond approximately one 4 x 8 panel (3/8" bead).

Henkel Corp/ OSI

PL Premium Construction Adhesive - Urethane-based.

Nontoxic, nonflammable/noncombustible. Gives off no fumes and is environmentally safer than other conventional adhesives. Securely bonds and is compatible with all building materials. Bonds can be made in temperatures ranging from 0° to 400° F. Material may be repositioned up to 1 hour without losing strength. Tested 3 times stronger than conventional adhesives and provides twice as much coverage as conventional adhesives. May be used inside or outside. 10 to 12 hour cure time. Exceeds VOC compliance regulations, exceeds glued subfloor and construction code AFGI-01, FHA bulletin UM-60, ASTM C557, and ASTM3498. Workable yield of adhesive per 10.2 oz. cartridge is 30'.

BUILDING MATERIALS

Cove Base Adhesive - Acrylic based adhesive with good initial tack and easy spreading characteristics for rapid installation of most vinyl and rubber cove base. Adheres to drywall, cured plaster, wood, plywood and hardboard, ceramic tile, fully cured concrete, and painted surfaces. *Do not* use over vinyl wall coverings or epoxy paint. Initial *wet grab* aids in wrapping corners and allows cove base to be positioned immediately after spreading. Coverage: 160 to 200 linear ft. per gallon. Water-resistant when dry. Freeze/thaw stable, nonflammable and VOC compliant. Color: White. Plastic pail.

Reliabond ES Ceramic Tile Adhesive - Reliabond extended set all-purpose professional adhesive formulated for wall, floor, and countertop installations of ceramic and stone (wall only) tile. Developed for hot weather conditions above 90° F. (32° C.) and warm, dry climates. Strong and water-resistant, spreads easily, and resists slipping on vertical applications. 60 minutes open time/adjustment time for installation of tile. Exceeds ANSI A136.1 Type 1 requirements. Allow 24 hours drying time before applying grout. Coverage: Approximately 40 to 60 feet per gallon using a 3/16" x 5/32" V-notch trowel. Freeze thaw stable. 1 year shelf life. Nonflammable, use adequate ventilation when applying product. Remove fresh adhesive from tile surface with a damp cloth. Clean tools in warm soapy water. Color: White. 3-1/2 gallon plastic pail.

SpeedFinish Patching and Finishing Compound - Fast curing, cement-based patching and skim coating compound that provides a smooth finish to a variety of substrates prior to the installation of floor coverings. Install most floor coverings in as little as 15 minutes. Excellent as an embossed vinyl floor leveler. Apply from featheredge to 1/2" thick. SpeedFinish eliminates installation problems of bond failure, crumbling, mildew, and staining of resilient flooring due to free moisture found in traditional underlayments. Apply over concrete, cement backer boards, RedGuard Waterproofing & Anti-fracture Membrane, exterior grade plywood (interior applications), ceramic tile, pavers, brick, stone, concrete terrazzo, sheet vinyl, VCT tile, and cutback adhesive (nonwater soluble). Do not use over OSB, particle board, hardwood, parquet floors, metal, cushion-backed vinyl flooring, or when temperature is below 50° F. (10° C.). Coverage: As a skim coat, approximately 250 to 300 sq. ft.; 10 lb. box yields 30 sq. ft. at 1/8" thickness. Clean with water before material dries. 10 lb. box.

Patching & Leveling Latex Additive - Increases adhesion and performance when skim coating or patching hard to bond to surfaces. Use in place of water to increase the bond strength of Skim Coat & Patch, SpeedFinish, Floor Leveler, Quik-Fix, or Fix-It-All patching compounds. When mixed with Skim Coat & Patch cement underlayment, it forms an ultra high-strength system over ceramic tile, stone, terrazzo, vinyl sheet goods, VCT tile, cutback adhesive or as an embossed vinyl floor leveler. Follow manufacturer directions for usage and coverages for specific job application. 1 gallon bottle.

BUILDING MATERIALS

Fast Set Nonshrink Grout - Commercial grade, rapid setting, very high strength, nonshrink grout designed for structural concrete repairs, anchoring, leveling, and for grouting machinery, steel columns, bearing plates, and pre-cast concrete. Designed for structural repairs from 1/4" to 24" D. Features a 30 minute set time, nonshrink characteristics and rapid strength gain. Can be mixed to a plastic, flowable or fluid consistency requiring only the addition of water. Exceeds the requirements of ASTM C-928 R-3 for structural concrete repair materials and complies with ASTM C1107 Grade C with a working time of 20 minutes at 72° F.

BUILDING MATERIALS

CPFilms, Incc.

Gila® Heat Control Insulating Window Film - Provides year-round comfort and energy savings by reflecting up to 70% of summer heat and retaining up to 55% of winter heating. Rejects 99% of damaging UV rays which offers protection to home furnishings and decor. Reduces rising energy costs. Insulating films are scratch-resistant for longer life and are compatible with dual-pane windows. Designed for easy DIY application. Film also provides a safe anti-lacerative barrier against broken glass caused by accidents or intrusions.

Great Stuff™ Insulating Foam Sealant for Gaps & Cracks

- No shrink, minimal expansion foam formulation. It foams, bugproofs, insulates, caulks, waterproofs, and seals. Bonds to plywood, styrofoam, urethane foam board, glass, and most plastics. Can be painted or sanded. Seals and insulates vans and campers. Tack-free in 45 minutes, completely cured in 8 hours. Can content yields 145 linear ft. of 1/2" round bead. 2 year shelf life. UL classified. No CFC's.

Dow Chemical Co.

Great Stuff™ Insulating Foam Sealant Big Gap Filler

- High-quality expanding urethane foam designed to fill large areas quickly and permanently. Uses include filling holes, cracks, or gaps that require a complete airtight and waterproof seal but are too large to be filled with ordinary caulk. The foam expands approximately 3 times its original volume, is tack-free in approximately 45 minutes, and fully cured in 12 hours. Dispensing apparatus included with each can. UL classified. No CFC's.

Product No.	Mfg. No.	Description	Order Mult.	Weight	Unit Cost

BUILDING MATERIALS

Dow Chemical Co.

Great Stuff™ Window And Door Foam - Polyurethane foam sealant exclusively formulated to air-seal the gap between the window or door, and its rough opening. Low-pressure formula sprayed into rough opening expands to fill gap, and will not buckle or bow window or door frames. Soft pliable yellow foam is easy-to-remove if gap is overfilled. Complements energy efficiency of window or door by providing a permanent weather-tight air seal, reducing heating and cooling costs. Foam repels water and prevents wood rot and other weather related problems associated with moisture. One 12 oz. can will foam up to 4 average sized residential windows (36" x 60", 3/8" wide gap, 1" deep). Conforms to ASTM standards. 12 oz. can Great Stuff™ window and door foam with dispensing apparatus.

Great Stuff™ Pro Gaps & Cracks Professional Applicator Foam

- Minimal expansion formulation insulating foam sealant. Type V residential fireblock penetration sealant evaluated in ICC-ES Legacy Report No. NER-645. Fills, seals, and insulates gaps up to 3". Dispenses with foam applicator tool (not included, sold separately) for precise control. Energy savings, eliminates unwanted airflow in winter and summer. Moisture-resistant skin prevents water penetration forming a durable, airtight, and waterproof bond. Quick cure time in less than 1 hour, tack-free in 6 minutes, and trims in 30 minutes. Foam sealant bonds to most building materials and can be painted or sanded. 1 can equals approximately 26 quart tubes of caulk. UL classified. Identifiable yellow color. 24 oz. can.

Great Stuff™ Pro Window & Door Professional Applicator Foam

- Polyurethane foam sealant exclusively formulated to air seal the gap between the window or door and its rough opening. Low pressure formula sprayed into rough opening expands to fill gap, and will not buckle or bow window or door frames. Dispenses with foam applicator tool (not included, sold separately) for precise control. Soft, pliable foam is forgiving and easier to remove if gap is overfilled. Provides insulation value complimenting energy efficiency of window or door. Moisture-resistant skin prevents and retards wood rot. Conforms to industry standards ASTM E-06 and ASTM E-2112. Quick cure time in less than 1 hour, tack-free in 8 minutes, and trims in 30 minutes. Bonds to all window types. 1 can equals approximately 13 quart tubes of caulk. UL classified. Identifiable orange color. 20 oz. can.

Dow Chemical Co.

Great Stuff™ Urethane Foam Sealant Contractor Size -

Self-contained 10 lb. carton is portable and includes all dispensing equipment needed. Factory-pressurized, so no mixing is required. Chemical is turned on and off by brass valve on professional dispensing hose, allowing maximum application control. UL classified. 10 lb. carton content yields 3200 linear feet of 3/8" round bead. Foam expands minimally after application, so there's little trimming, little waste, little clean up. Seals cracks in hard-to-reach areas preventing air escape, dust and moisture entry, and also blocks pest entryways. Foam sealant is paintable and sandable, will not dry out, crack or shrink, but retains its properties and adhesion allowing flexibility as the house settles with age and moves with temperature change. Building code approvals. 2 year shelf life. No CFCs.

Daptex™ Latex Foam Sealant - Latex polymer foam insulation that expands 10 times the content of the can to economically fill and seal large gaps and holes. Stops air infiltration and will not degrade or shrink. Foam sealant is recommended for use around windows and doors. Foam will not over expand, and dries flexible. Seals gaps around foundations, basements, crawl spaces, around cables, electrical boxes, and pipes to sound proof and insulate. Tack-free in 10 minutes, 1" bead is fully cured in less than 24 hours. 12 oz. can contents will form 510' of 1/4" bead. Dispensing apparatus included with each can. Clean up fresh uncured foam with soap and water, cured foam must be physically removed. Use in well ventilated area. Paintable. 18 months shelf life.

Titebond® Solvent Free Cove Base Adhesive - For the easy installation of rubber and vinyl cove base, this adhesive sets fast, provides a strong grab, and eliminates sagging. Offers excellent adhesion to drywall, wood, plaster, ceramic tile, gypsum wallboard, paneling, concrete, metal, and painted surfaces. Environmentally superior, it is nonflammable, emits no harmful fumes, and cleans up easily with water. Highly water-resistant when dry and freeze/thaw stable. Not designed for continuous submersion. Coverage: 89 linear ft. of 4' cove base using 1/4" bead. 29 oz. cartridge.

Allure™ I Range Hood - Sleek, innovative styling, 30" wide convertible range hood can be installed ducted or nonducted, for easy replacement of older hoods. Allure™ I is 50% quieter than comparable, conventional hoods, with the addition of a noise reducing motor isolation system. A patented axial blade system eliminates smoke and moisture more quietly and effectively. Rocker switch controls with LED *On* indicator operate 2-speed fan and lighting. 2 Par20 halogen bulbs (not included) offer brighter cook top surface lighting with 2 light settings. 4-way convertible, installs 3-1/4" x 10" horizontal and vertical ducted, 7" round vertical ducted, and nonducted. 200 cfm. Aluminum filter model No. BPS1FA30 is included with range hood for ducted installation. For nonducted installation use replacement filter model No. BPSF30 not included with range hood.

Quiet Hood™ Range Hood - Convertible 30" wide range hood can be installed ducted or nonducted for easy replacement of older hoods. Quiet Hood™ features a patented air chamber design that significantly reduces noise up to 40% over comparable, conventional hoods. Variable speed control provides effective ventilation for all kitchens. Dual 40W lamps increase light efficiency. Includes nightlight option. (Lamps not included). 4-way convertible, installs 3-1/4" x 10" horizontal and vertical ducted, 7" round vertical ducted, and nonducted. 200 cfm. Aluminum filter model No. BPQTAF is included with range hood for ducted installation. For nonducted installation use replacement filter model No. BPQTF not included with range hood.

Anaerobics

3M™ Scotch-Weld™ Threadlocker

3M™ Scotch-Weld™ Threadlockers are one-component anaerobic adhesives that cure and seal threaded assemblies that meet a wide range of applications to prevent vibration loosening and/or leakage. All products provide excellent vibration, corrosion and shock resistance. Engineered to provide different strengths, temperatures, nut/bolt sizes and other requirements, these threadlockers allow removal and meet various selections depending on the specific application.

Henry, W.W. Co.

348 CeMastic™ Universal Tile Setting Adhesive - A portland cement based tile adhesive capable of setting almost any type of tile, including porcelain, glass, mosaic, fully vitrified, semi vitrified, and nonvitreous tile, quarry tile, and natural stone (not moisture sensitive such as marble). (For marble tile installations use Henry 316 MarbleFlex™ Thin-Set Mortar, model No. FP00316412.) Mix only with water to a creamy, smooth mastic consistency. CeMastic™ adhesive combines the bonding power of a latex modified thin-set with the application ease of a mastic adhesive. Bonds to wood, concrete backer board, concrete, masonry, drywall, sheet vinyl, terrazzo, ceramic tile, plastic laminates, and cut back adhesive residue. Approximately 20 minutes open time, depending on the substrate and job site conditions. Dries fast, grout in as little as 3 hours. 7.5 lb. box will cover 60 sq. ft. when applied with a 5/32" D. x 3/16" W. V-notched trowel, or 25 sq. ft. when applied using a 1/4" x 1/4" x 1/4" square notched trowel. Ideally suited for all interior tile installations including floor, walls, and countertops. Water-resistant. Do not expose to freezing. Use clean, damp cloth for clean up. If material dries, use mechanical means to remove. 7.5 lb. box. Color: Off white.

Henry, W.W. Co.

316 MarbleFlex™ Fast Setting Thinset Mortar - A portland cement based thinset mortar for setting of floor and wall tiles for interior applications. Due to its self-drying portland cement formulation, MarbleFlex™ will not contribute moisture to marble or stone tile, making it suited for use with moisture-sensitive tile and stone. The quick drying formula allows tile and stone to be grouted in only 2 hours. For use with marble (including black and green marble), granite, stone tile, ceramic tile, mosaics, and pavers. For porcelain and nonabsorbent tiles use Henry 348 CeMastic™ Universal Tile Setting Adhesive (refer to model No. FP00348407). MarbleFlex™ bonds to concrete, concrete backer board units, masonry, cement terrazzo, drywall, and other common building surfaces on interior floors, walls, and countertops. Easy-to-mix, just add water. 12.5 lb. will cover 19 to 22 sq. ft. when using a 1/4" x 1/4" x 1/4" square notched trowel, or 16 to 19 sq. ft. using a 1/4" x 3/8" x 1/4" square notched trowel. Do not expose to freezing. Use clean, damp cloth for clean up. If material dries, use mechanical means to remove. 12.5 lb. box.

LevelQuik™ Rapid Setting Self-Leveling Underlayment

- A Portland cement based, pourable, self-leveling, underlayment which requires no latex additive, only water. No troweling necessary, LevelQuik™ flows and seeks its own level. Levels floors prior to installing ceramic tile, carpet, resilient flooring, wood flooring, etc. Apply over concrete, cement backer board, ceramic tile, brick, pavers, terrazzo, marble, and plywood. Not recommended over hardwood or parquet floors. Recommended interior use and when ambient temperature is over 50° F. Cure time: 12 to 16 hours. Coverage: One 50 lb. bag will cover approximately 40 sq. ft. at 1/8" thickness. Packaging: 50 lb. bag.

LevelQuik™ Concentrated Latex Primer

- A concentrated latex primer/sealer that seals porous substrates. Enhances bond of level quick self-leveling underlayment and other cementitious toppings. Use as a primer/sealer over concrete, cement backer board, ceramic tile, brick, pavers, terrazzo, marble, or plywood. Not recommended over hardwood or parquet floors, existing vinyl, sheet goods, plastic, or metal surfaces. Apply above temperature of 45° F. 1 gallon covers approximately 300 to 500 sq. ft. depending on porosity of substrate. 1 gallon bottle.

Premium Plus™ Thin-Set Mortar - Contractor Preferred smoother consistency, longer open time, and more coverage per square foot than Master-Blend™ Thin-Set Mortar. Dry-set mortar formulated of Portland cement modified with self-curing, water-retentive, adhesive chemicals and fillers. For interior or exterior use. Use to bond ceramic, mosaic and quarry tiles, cement tile, precast terrazzo, natural stone, marble, and mini-brick to concrete substrates, masonry, gypsum wallboard, wonderboard® backer boards. If extra high-strengths are desired add acrylic mortar admix (model No. AMA3 and AMA1). Not recommended for use over hardwood, parquet or vinyl flooring, or their adhesive residue, metal, fiberglass, particle board, Luan plywood, or lightweight concrete. Approximately 100 to 110 sq. ft. per 50 lb. when applied with 1/4" x 1/4" square notched trowel. Pot life: 2 hours. Allow to cure 24 to 72 hours before grouting. Clean up immediately with water. 50 lb. bag.

Custom Building Prod.

Versabond™ Bonding Mortar - Polymer modified, Portland cement mortar system formulated to provide excellent adhesion to interior surfaces without the addition of a latex additive. Use to adhere glazed and unglazed ceramic mosaic, glazed wall tile, quarry, terrazzo, cement-bodied tile, high-lug tiles and pavers to properly prepared interior surfaces such as exterior grade plywood and many resilient flooring surfaces. It also offers increased bond strength when adhering to conventional thin set mortar substrates such as concrete, concrete block, wonderboard®, gypsum drywall, and existing ceramic tile. Interior use only. Not recommended over cushion resilient flooring, hardwood or parquet flooring, particle board, wafer board, masonite, metal or plastic. Coverage is dependent upon substrate, tile, and size of notched trowel. Average coverage is approximately 2 sq. ft. per lb. Allow to cure 24 to 72 hours before grouting. Clean up immediately after use with water. Gray.

QUIKRETE

Fast Set Repair Mortar - Commercial grade, specially formulated polymer modified concrete repair mortar, for making structural repairs in vertical and overhead applications to concrete, masonry, or stucco surfaces. Exceeds requirements ASTM C-928 R-2 for structural concrete repair materials. 20 to 30 minutes working time, can be sculpted to match the contour of existing concrete surfaces. Use for repairing pre-stress panels, loading docks, tunnels, retaining walls, bridge columns, and curbs/steps. Large vertical or overhead patches deeper than 2" should contain reinforcing steel. Contains Portland cement. Ready-to-use, just add water. 20 lb. pail.

QUIKRETE

Quick-Setting Cement - Commercial grade high strength repair material for making structural repairs to horizontal and vertical concrete surfaces. Quick-setting cement is a uniformly blended, properly proportioned mixture of Portland cement, graded sand, and other proprietary additives, designed to provide a moldable, gel-like consistency requiring only the addition of water. If the application is greater than 1", apply Quikrete Concrete Bonding Adhesive to enhance bonding qualities. Use for making repairs to concrete curbs, steps, floors, pavement, walls, and concrete pipe without the use of forms. Sets hard in 10 to 15 minutes. Natural concrete color. 10 lb. pail.

Product No.	Mfg. No.	Description	Order Mult.	Weight	Unit Cost

Fiberock® Brand Aqua-Tough™ Underlayment -

Fiberock® brand Aqua-Tough™ underlayment provides a smooth, uniform surface that is an excellent substrate for various floor covering installations. The Aqua-Tough™ technology features a uniform, specially engineered composition for superior water and mold resistance, through and through. Fiberock® brand Aqua-Tough™ underlayment surpasses traditional plywood, oriented strand board (OSB), and lauan underlayments in retaining dimensional stability. Made of 95% recycled material, the underlayment offers an environmentally friendly alternative to wood-based underlayments. This versatile product may be used in both wet and dry areas throughout an entire home, under vinyl, ceramic tile, carpeting, wood, or laminate flooring. Panels simply score and snap with minimal effort for easy sizing and installation. Fiberock® brand Aqua-Tough™ underlayment includes a 15 year warranty against buckling, warping, delamination, cracking, and splitting upon fastening. Product is not intended for use on walls or ceilings, areas with prolonged exposure to standing water, directly installed over concrete subfloors, or heavily cushioned, thick-foam backed, or perimeter-adhered vinyl flooring. For ceramic tile applications underlayment must be bonded using mortar of adhesive and mechanically fastened to the subfloor. 1/4" thick x 3' W. x 5' L.

Meets underlayment needs in both wet and dry areas throughout the home.

Moisture and mold-resistant.

Provides a smooth, flat surface under vinyl, ceramic tile, hardwood flooring, laminate flooring, and carpeting.

Resists indentation from heels and furniture.

Delivers superior adhesive bonding and workability.

Recognized by major resilient flooring and adhesive manufacturers.

Tested by Tile Council of America (Robinson Floor Test Method) and approved for residential and light commercial use (as defined by TCA).

Environmentally friendly - 95% certified, recycled content.
